# STAY TOGETHER

## ROOKIE LIFEGUARD

Help!

Jackson has been separated from his friends! It's always safer to stay together when in or around the water, so can you help him find his way back to them?

# ARITHMAGONS

See if you can solve these four arithmagons.

The aim of an arithmagon is to work out which numbers go in the empty circles. The numbers in the square boxes are made by adding together the numbers in the circles either side. For example, if the number in the square box was 10 you could try 6 and 4, but the numbers must also add up on the other edges, making this more difficult than it first appears.

# FANCY LIFEJACKET

Lifejackets are all the rage, can you make this one even better with some exciting colours?

Everyone needs one!  
Can you copy the lifejacket above?  
Use the grid to help you.
